PROFILE

I am a 27-year-old full-stack developer with a strong passion for technology and a relentless drive to learn and apply the latest advancements. My goal is to create user-friendly, elegant, and functional products as efficiently as possible. I thrive in environments that encourage iteration and continuous learning, where I can explore and implement cutting-edge technologies to deliver innovative solutions that make a real impact.

EMPLOYMENT HISTORY

FullStack developer, Re:co

London

Jan 2024 — Present

I have been responsible for developing and maintaining web applications

AWS Developer, British Airways

London

Sep 2022 — Jan 2024

Developed a serverless application to send real-time notifications to users about their luggage location using AWS SNS, synchronized with airport staff events. Leveraged AWS services like DynamoDB, Lambda, SQS, and CloudWatch to create a scalable and efficient solution. Successfully delivered the project on time and within budget, collaborating effectively with cross-functional teams.

Frontend Developer, UBS

London

Jan 2021 — Sep 2022

Developed a web platform for managing events and meetings. I was responsible for creating, estimating, and developing tasks, as well as regularly with the client. My experience allowed me to develop strong technical skills in as well as communication and project management skills. I delivered the project on worked closely with the team to ensure its success.

ETRM Developer, NESTE

London

Sep 2020 — Jan 2021

Developed and enhanced backend workflows for an ETRM system, expanding its functionality using C#. Designed and implemented a serverless application to provide real-time luggage location notifications via AWS SNS, synchronized with airport staff events. Leveraged AWS services like DynamoDB, Lambda, SQS, and CloudWatch to create a scalable, efficient solution. Successfully delivered the project on time and within budget, collaborating closely with cross-functional teams.

FullStack Developer, Repsol

Madrid

Jan 2019 — Sep 2020

As a junior fullstack developer at Repsol, I developed administration portals using React, created mobile applications, and provided support for Azure microservices. Additionally, I was part of the team responsible for developing a new payment application for Repsol stores using Azure cloud services. My experience allowed

me to develop strong skills in React, mobile app development, cloud services, communication, and teamwork.

EDUCATION

Higher National Diploma (HND) in Computing , CES

Madrid

Jan 2018 — May 2019
